Good Overview With Some Original Perspectives

By C. A. Loewen

Whenever I read a book, my first thought is, is the author actually experienced enough to address his subject matter? Having read the book and searching for the author on the 'net provides enough proof that he does know what he is writing about, not from theory, but from actual practice.

Also, Werrell realistically tackles the common problem with people who read self-help books. If they know what to do, if they have read the literature, if they have attended the seminars, why aren't they successful? In answering the question, one hears faint echoes of Larry Winget without the hellfire and brimstone, but don't think Werrell is going to mollycoddle you. His questions demand answers and his book demands some serious soul searching.

In closing, my only criticisms of the book are that the title is misleading. There are no eleven secrets: just important aspects of being effective that people who truly want to be change agents must be reminded of

continually or that lazy people need to remember daily. I would have titled the book, **Eleven Hard Realities Successful People Must Embrace**, but that probably would not have attracted as many readers.

My other criticism is Werrill's references to the so-called Law of Attraction, which is nothing more than the psychological Law of Focus smothered in contradictory metaphysics.

Nonetheless, the book is a great read with practical, useful advice and it was well worth my time to read and study.

This one goes in my "It's A Keeper" file.
