Review

Ol' Skool Rodz, May 2007

“What makes the book so valuable is the way that Bishop and Tardel explain to the reader not only what they are doing, but the logic behind the decision to do each different aspect of the car a certain way. From picking an intake manifold to deciding on the proper brakes and even choosing the best Flathead block, Vern Tardel’s many years of experience in building Ford hot rods is free for the price of a softbound book ... Thinking about building a hot rod? This book is a great resource.”

HOW TO BUILD A TRADITIONAL FORD HOT ROD (MOTORBOOKS WORKSHOP) BY MIKE BISHOP PDF

Build your own flathead roadster just as it would have been built in the 1950s! Using a 1929 Ford Model A, this guide follows its construction from start to fantastic finish. Bishop begins with a wealth of expert advice on planning your project, finding traditional parts, and acquiring the tools, time, space, and services needed. From frame, front suspension and steering, to brakes, engine and transmission, Bishop's expert approach is fully illustrated with specially commissioned photos and line drawings.

How to Build a Traditional Ford Hot Rod

By William Baker

I found this book to contain a lot of information on how to build hot rods as I built them in the 50's & 60's.

The book could go into more depth

in the area of using what parts were available in those days. I was happy to see information that goes back to old school and away from the fiberglass, mustang front ends etc. that anyone can build from kits etc. I wish there were more old school information that we were able to get from the Hot Rod magazines of the 50's/60's. Perhaps someone could re-publish the articles from the old mags so could build a true 50's/60's Ford hot Rod. This book is as close as I have found to what little information still exists.
