A disturbing and failed attempt at a difficult topic

By GNap

A friend recommended this book after hearing a promotion for it on the radio. She said it was a useful way to broach the sensitive topic of molestation with your young ones. The book, however, is neither useful as a conversation tool with toddlers, nor is it well-written. This book will traumatize your children and unnecessarily demonize the men in their lives who could actually help them. You don't have to traumatize your children in order to protect them. Do not buy this book. Explain to your toddlers, boys and girls, that their privates are to be touched by no one, then parent your children as vehemently as any human being can.

The author really got it wrong here.

Tomatos are NOT in season!

By Nevada Powe

Finally a book that makes it easy to talk about an extremely delicate subject to a very young girl. The illustrations are absolutely beautiful and the language can draw in a child. This should be in every early childhood school, every day care operation and every home where young girls reside. Protect our girls! Help them define appropriate boundaries. Forewarn, pre-arm and disseminate appropriate information.

A Courageous Tour de Force re child sexual molestation

By OnlineCounsellingJamaica

This is a toughie!! From the point of view of an academic and counsellor there are all kinds of debates as to the wisdom of using a metaphor for the vagina when trying to teach your kids about this sadly rampant issue in Jamaica and the world. This comes from the gut though...and the reason I say sois the page on smell...no doubt about it...smell is the sense that most deeply embeds memory...I know that I use mine to detect whether there is a brigand lurking around in the dark...for a kid it's no different... a brave effort...out of

the closet in fabulous colour...as always with this kind of book...you do not just let the child read it...you sit with him/her and explain everything in detail in an age appropriate way and this book is then stored in a special place not just left about ...I can see the disquiet of the the 'one star reviewer'...there are pictures of the classic 'dark man' of the universal human psyche...but that's what it is...I know this 'man' well in my own dreams. And a suggestion - It might be helpful in the next edition to shade in the illustration to a couple of tones darker around the little cartoon limbs when they are superimposed over the body of the tomato to give it higher definition re what is 'limb' and what is 'trunk'.

Whew, something has come up from the sewer here, been put in the light and conceptualised in such friendly colour that it took a special mind to do this...& Rorie can illustrate boy!!!! If this book does nothing else it blesses by stirring what is persistently shoved under the carpet in a disgraceful way at all levels of society, in all cultures around the world...
