Life, death, God and computers
By T J Westlake
A great book that I first read almost 20 years ago. Swigart takes you on a surreal trip through the Silicon Valley of the late seventies and through ancient Sumeria. Poking fun at life, death, God and Computers, I recommend it for anyone with a warped sense of humour

Boy! Can this man write!!!
By Richard Lewis
I read Mr. Swigart's great sci-fi novel: "The Time Trip," because I wanted to see how it compared to my own sci-fi novel: "Time Trip on a Moebius Strip." Even though his novel was nothing like my own, I was completely amazed by his writing...Can this man write! His story is way out...He has this brilliant computer scientist teleported to ancient Mesopotamia, 2642 B.C., looking for his wife who had committed suicide in a microwave oven, believe it or not...He then meets up with his wife in a former incarnation, who doesn't even know him, and who is working as a temple prostitute. She then introduces him to of all people, the king "Gilgamesh" who becomes his best friend...They have many adventures together...What happens after that you will have to read the book to find out....If you like sci-fi novels by Kurt Vonnegut, then the novels of Mr.

Rob Swigart are right up your alley....
